Graduate Reporting Center

The Graduate School has included many predefined queries in the Graduate Reporting Center for easy access. Additional queries may be created and added in the future. The Graduate Reporting Center is available to staff who have access to GradPlan.

- Log-in to SIS at [https://student.msu.edu](https://student.msu.edu).

Navigation: Admin homepage > Graduate & Professional tile > Graduate Reporting (left-hand menu)

A list of report categories is displayed on the left; click a section heading to show the queries within the section.

New/Additional Queries

- New queries may be added to the **Graduate Reporting Center** as they are developed.
- Additional queries are available in Query Viewer by entering MSU_ in the box to the right of “begins with” and clicking “Search”. Entering MSU_GR in the field brings up only Graduate related queries. Entering MSU_RPT in the field brings up other available public reports.

Query Prompts

Some queries prompt you to narrow your search results by requiring specific information before conducting a search. Prompts prefaced with an asterisk (*) are required to be filled out for the query to generate. Other prompts are optional (no asterisk) but may be useful in narrowing results.
In the example above, the **Annual Review Missing** query was selected from the **Warning Reports** option.

1. **Required prompts** (*): institution, a term, and career.

2. **Optional prompts**: academic program (college/student level – e.g., Engineering Doctoral) and any additional academic plans.
   - Again, while optional, entering this information will help narrow your search results.

3. **Prompt lookup**: if you don’t know the prompt value you need, click the magnifying glass icon next to the search field to open a screen where you may search by a name or more refined criteria.

   - In the example, we are using the **Advanced Lookup** section (click **Basic Lookup** to revert to a simpler search).
   - For this search example, we are looking for the Sociology PhD plan, which most likely begins with “SOC,” so you may enter a partial value, then click **Look Up**.
   - If we were to leave the **Academic Plan** section blank and click **Look Up**, we would see a complete list of all values.

4. **Run report**: once you have entered your desired search prompts, click **View Results** to
generate the corresponding list of students.

- **Note**: certain queries may yield results containing links to other pages. In the example below, the Track RECR Page link opens the RCR tracking page for students.
